

A TEI test document using RefDB
2001-12-26

1. Preface

This document was created using the TEI XML DTD P4. The bibliography was created with RefDB. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer.

2. Some example citations

This is a citation (Eccles and Moriarity, 2003). The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer.

This is a multiple citation (Eccles and Moriarity, 2003; Cerwinka et al. , 2002; Mizusawa et al. , 2002). The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer.

This is a book (Miller and Myers, 1999) and this is a book chapter (Walsh, 1999). The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer.

Eccles and Moriarity reported recently (2003), that textual citations also work. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer.

This is another multiple citation (Eccles and Moriarity, 2003; Cerwinka et al. , 2002; Mizusawa et al. , 2002). The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer.

This is yet another multiple citation (Eccles and Moriarity, 2003; Cerwinka et al. , 2002; Mizusawa et al. , 2002). The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer.

Here we cite a newspaper article (Anonymous,). The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer.

Here we cite an electronic source (Walsh and Muellner, 2002). The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer.

Here we cite a case (Anonymous, 1968). The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer. The additional text is required to make the printed output look nicer.

3. Reference List

Anonymous, Jailing Hayden?, Commonweal
